

CEVA's Supply Chain Solutions 4PL and LLP Services

Today's global marketplace is characterized by complex challenges driven by dramatic seasonal fluctuations in market demand. Cost pressures from many directions mean SKU and activity profiling are essential to stay on top of what's happening across your supply chain.

To compete effectively in this environment, you need to balance inventories, utilize the best IT support for order processing, while at the same time increase profitability through the flexibility and efficiency of your supply chains.

CEVA fully understands what makes a supply chain tick and translates its knowledge into evolving, improving solutions which are innovative, efficient, and scalable whatever your operations' size.

CEVA's Supply Chain Solutions represents a comprehensive supply chain management 4PL and LLP service which provides the orchestration, execution and performance ownership of all supply chain management functions from origin through to ultimate destination.

Our objective is clear: to deliver measurable value to your business by providing greater visibility and control of your entire supply chain operations.

Your benefits:

- Reduced end to end supply chain costs
- Proactive management of freight flows
- Increased flexibility and control
- Efficient use of all transportation modes
- Greater visibility and real time information
- Reduced risks and disruptions

Our services: Addressing your needs

Supply Chain Control Tower

CEVA's SCS global control tower infrastructure provides the scalable and efficient supply chain management services to our 4PL and LLP customers, applying configurable, repeatable and proven processes. Services include PO management, transport planning and optimization, supply chain execution, disruption management, performance management and more.
